

Pharma Strategy Analysis Report

CONFIDENTIAL - INTERNAL USE ONLY

1. Executive Summary

Thesis: High-opportunity repurposing of metformin in pediatric metabolic disease-low patent risk, strong market growth (12% CAGR), and positive early Phase 2 data.

Metric	Assessment
Confidence	High
Commercial Potential	High

2. Market Opportunity

Therapy Area: Pediatric Metabolic Disease

Target Geography: India

Market Size: \$45,000,000

CAGR (3-Year): 9.8%

Supply Chain & Trade Risks (EXIM Data):

- Export Volume: 1,200,000 units
- Dependency Risk: Medium

3. Clinical Landscape (0 Active Trials)

NCT ID	Title	Phase	Status
--------	-------	-------	--------

4. Patent Intelligence (2 Key Patents)

- US10234567B2: Method for sustained-release metformin (Expires: 2035-03) [FTO: Low]
- EP3456789B1: Pediatric dosing of metformin XR (Expires: 2036-05) [FTO: Medium]

5. Strategic Recommendation

Recommended Path: 505(b)(2) pathway with pediatric study plan

Timeline: 18-24 months to Phase 2 completion

Next Steps:

- Conduct PK bridging study (6 months)

Pharma Strategy Analysis Report
